MOTIVATION

1

India vs New Zealand, 1st Test, 2016

Umesh Yadav, right-arm fast medium, comes into the attack

Some respite for my fingers. They have been more active than any NGO has ever been. One slip

Update: Rahul has a hamstring issue and is hence off the field

24	Runs Scored: 2 0 0 0 0 2	Score after 24 overs NZ 61-4	Santner Ronchi	2(8) 13(22)	Ashwin 12-1-51-3
----	-----------------------------	---------------------------------	-------------------	----------------	---------------------

2

India vs West Indies, 1st T20, 2016

This is it from this game. What an enthralling one we had. My fingers still bleed from the action we saw (read I typed). But I am not complaining even a little bit. Hopefully we see

India vs South Africa, 3rd Test, 2015

Welcome back... I'm being selfish and looking at my plight when I type this. Great to see South Africa bowling. They won't start with two spinners. Morkel will begin. Gives my fingers breathing space and my heartbeats become normal. Everything seems fine with the world at the very moment. Never seen a Test match before where every ball had so much action happening. I haven't covered a game like that. Today's morning session was manic to say the least. Anyway enough of that. Let's move on. Morkel has the ball. Two slips in place. Vijay on strike

4

India vs New Zealand, 1st Test, 2016

15.1 Jadeja to Latham, no run, flat and quick, Latham defends off the back foot

Now round the wicket comes Jaddu to Latham

Lots of field changes inside the same over from Kohli. Difficult to keep track when the spinners are rushing through their overs, but will try my level best to keep you updated on everything

15

Runs Scored: 1
0 1 0 0 0 0

Score after 15 overs
NZ 50-1

Williamson
Latham

7(15)
18(44)

Ashwin
3-0-9-0

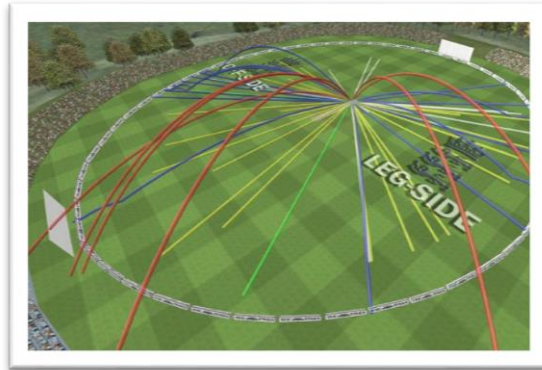

14.6 Ashwin to Williamson, no run, now eludes short leg with the same shot, but mid-wicket is there

WHAT IS THE **COMMENTARY BOX** ABOUT?

- ❖ Helping hands to cricket forums like CricBuzz, ESPNCricinfo, etc.
- ❖ **The Commentary Box**
 - Mimicking commentators
 - A system which uses ML and AI techniques to provide automatic real-time commentary.
- ❖ **Proposed Approach**

Detect the **Type of Shots**
played using **Sensors**

Trace the trajectory of ball to
identify boundaries

Track the movements of the
batsman to know the number of
runs he took

USE CASES

- 1 Personal Assistance to Online Commentators
- 2 Reduction in man power required for commentary
- 3 Instant display of live scores and commentary

Shot Classification

DEVICE USED

❖ Metawear CPRO

- Accelerometer + Gyroscope
- Magnetometer
- Pressure (Barometer) + Temperature
- Ambient Light

- ❖ Determining angular position in 3D space

❖ Problems with Accelerometer

- Every small force working on the object disturbs the measurement
- Will see movement in every direction due to large no. of forces

❖ Problems with Gyroscope

- the angular position has the tendency to drift because of the integration over time
- Does not return to zero when the system goes back to its original position

❖ Complementary Filter

- “Best of both worlds”

$$angle = 0.98 * (angle + gyr Data * dt) + 0.02 * (accData)$$

- Short term data from gyroscope (not susceptible to external forces)
- Long Term data from accelerometer (no drift)

WHICH SENSORS TO USE?

11

Accelerometer-X

Gyroscope-X

— SWEEP
— CUT
— STRAIGHT

WHICH SENSORS TO USE?

12

Comp-Pitch

— SWEEP
— CUT
— STRAIGHT

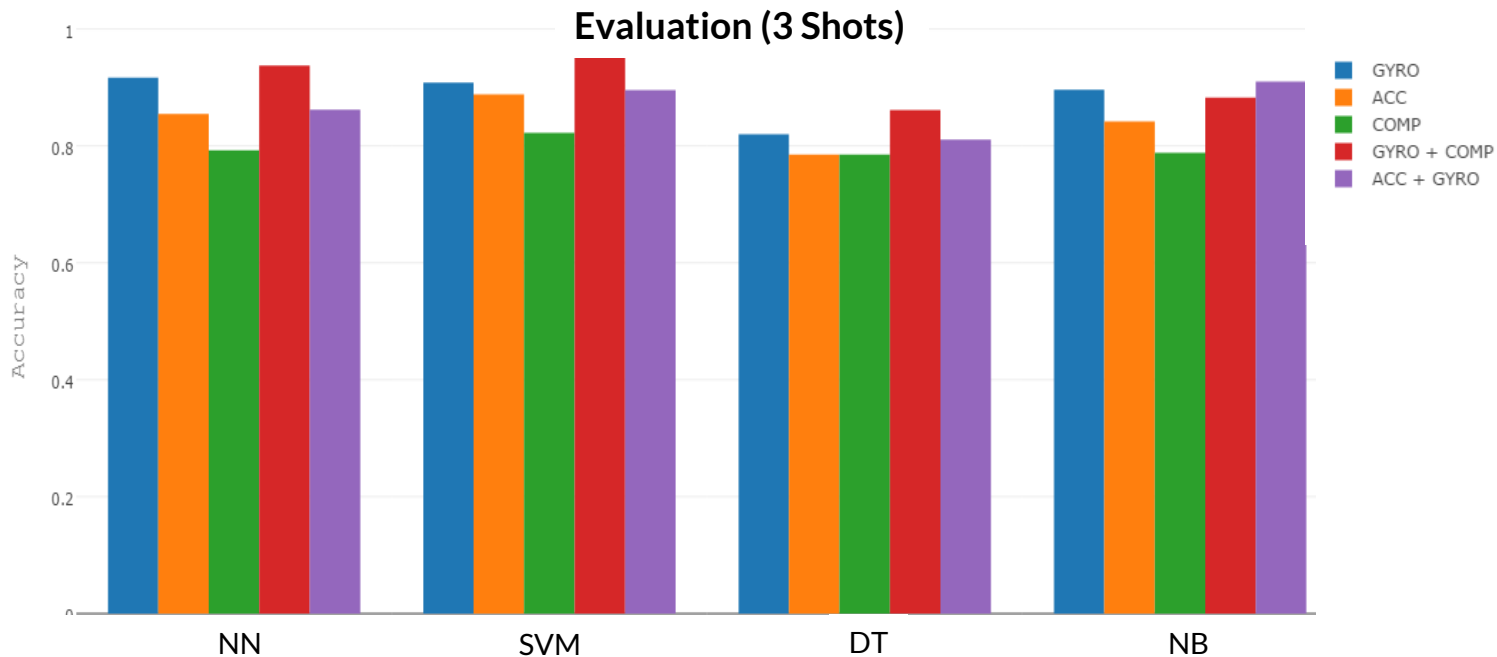

Comp-Roll

EVALUATION WITH 3 SHOTS

❖ Cut, Straight Drive and Pull

❖ K-Fold Cross Validation with $K = 10$ (180 examples)

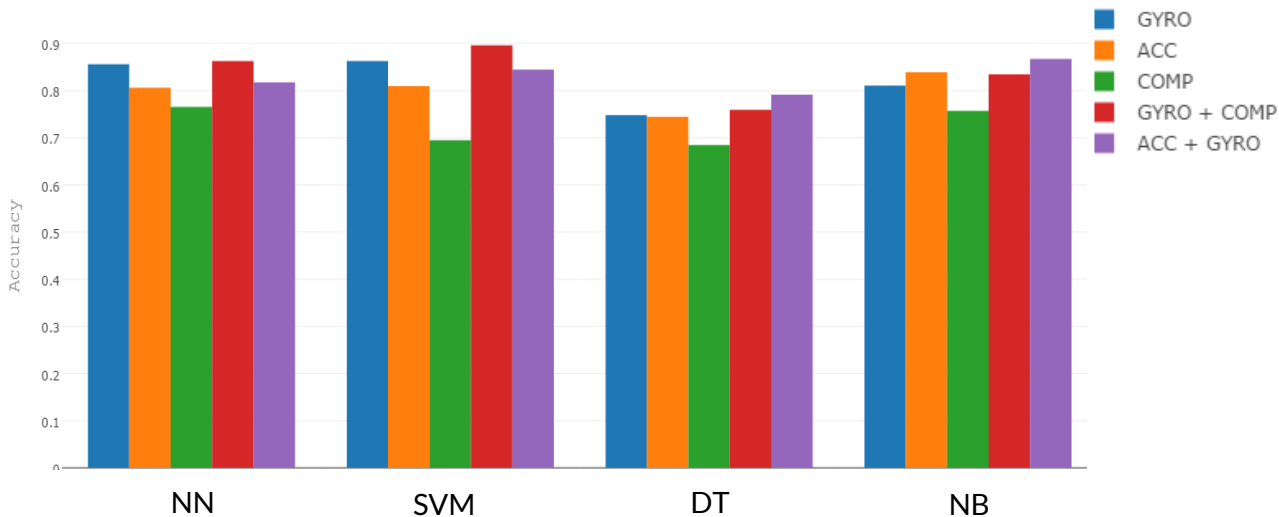

EVALUATION WITH 5 SHOTS

- ❖ Confusing Shots:
 - Cut & Cover Drive, Pull & On Drive
- ❖ K-Fold Cross Validation with $K = 10$ (300 examples)

Evaluation (5 Shots)

MULTI-PLAYER TESTING

- ❖ Generalized model not likely to work
- ❖ Train for different batsman separately

❖ Train on one, Test on other

PLAYER+SHOT IDENTIFICATION

- ❖ Collect training data over multiple batsman
- ❖ Build a model which first figures out the player and then the shot

ROAD **AHEAD**

- 1 Right Handed vs. **Left Handed Batsmen** (will require different models)
- 2 Inferring the **number of runs scored**
- 3 Inferring **boundaries** and **wickets** using trajectory of the ball

Thank You!!
